Abhishek Arun

Gurugram, India +91 85472 36977 abhishek.arun.work@gmail.com LinkedIn abhishekarun.com/cv

Summary

Associate Product Manager at Internshala, working on the candidate side: the end-to-end experience students and job seekers have on the platform. Before that, two product management internships at TruckHai (logistics) and WebMobi (SaaS). Outside work, built six products independently from problem to live product, including Marg, a multimodal journey planner for India, and SpendFlow, a privacy-first personal finance app. Drawn to AI and SaaS products, and to getting the problem right before building anything.

Experience

Internshala Jul 2026 – Present
Associate Product Manager *Gurugram · Career-tech*
- PM on the candidate side of the platform, owning the end-to-end experience for students and job seekers; demo features to partner colleges and present product work to internal teams

TruckHai Feb 2026 – Apr 2026
Product Manager Intern *Logistics*
- Identified friction in core logistics workflows through stakeholder interviews; translated findings into structured PRDs and acceptance criteria
- Partnered with engineering and design to refine backlog prioritization, reducing iteration cycles
- Contributed to sprint planning and cross-functional coordination in an Agile environment

WebMobi Nov 2025 – Jan 2026
Product Management Intern *SaaS*
- Owned UX and feature improvements across SaaS products, focused on reducing drop-offs and improving usability metrics
- Conducted user research and competitor analysis to drive roadmap and feature prioritization decisions
- Delivered production-ready feature specs in collaboration with design and engineering teams

Products Built (Independent)

Marg — Multimodal Journey Planner for India Next.js, React, TypeScript
- Built solo as PM, designer, and engineer: combines metro, trains, flights, buses, ferries, autos, and cabs into door-to-door journeys; installable PWA in English and Hindi, live in early preview

SpendFlow — Privacy-First Personal Finance React, TypeScript, Firebase
- Built solo: one-line entry (e.g. "250 swiggy upi") with on-device answers; offline-first PWA, live at release 1.0.0

Vidyarambham Certificate System — Client Project Next.js, Prisma, PostgreSQL
- Digitized certificate issuance for a temple's Vidyarambham event, handling 100 requests in 3 hours, with a QR request flow, one-tap volunteer approval, and printable certificates (designed and built solo)

Afterward — Digital Legacy Planning React, TypeScript, Firebase
- Built solo: documents accounts, wishes, and trusted contacts so families aren't left with a maze; never stores passwords

Focus Docs — Document Collaboration React, Firebase
- Built solo: minimal document collaboration with access set per section, not per document; live prototype

Tesseract — School Timetable & Substitution Management React, Firebase
- Founder and lead: built a scheduling engine that keeps the timetable working when a teacher is absent; piloted with one school

Skills

Product: Product Strategy, Roadmapping, PRD Writing, User Research, Prioritization, JTBD, Agile/Scrum, A/B Testing, MVP Planning, KPI Definition, GTM Strategy, Competitor Analysis
AI: Prompt Engineering, LLM Use Cases, RAG Basics, AI Workflows, Human-in-the-Loop Design, AI Evaluation, AI Safety UX
Technical: React, Next.js, TypeScript, Firebase, Supabase, PostgreSQL, SQL, REST APIs, System Design, Analytics, No-Code
Design & Tools: Figma, Wireframing, Prototyping, User Flows, Jira, Linear, Notion, Miro
Languages: English (Professional), Malayalam (Native), Hindi (Elementary), Tamil (Basic)

Education

SRM Institute of Science and Technology Chennai
B.Tech — Computer Science (Gaming Technology track) *2022 – 2026*
Otten English School Wandoor, Kerala
Class XII (CBSE) *2022*
Sainik Public School Wandoor, Kerala
Class X (CBSE) *2020*

Leadership, Certifications & Awards

- Led teams at SRM hackathons, owning the build and presenting the pitch to judges
- Rajya Puraskar, Scouts & Guides Kerala (highest state-level scout distinction)
- AI for Product Management, Product Management Basics (Pendo.io); JIRA (Simplilearn); Networking Basics (Cisco)
